KINGSVILLE NURSERIES
INCORPORATED
KINGSVILLE - MARYLAND

H. J. HOHMAN

Kingsville Nurseries have specialized for years in the propagation of rare plants, including Dogwoods, Hybrid Lilacs, Japanese Cherries, Evergreens and other unusual plants.

Rare, new plants that have been tested for hardiness, and usefulness.

BUXUS, Rare—

Microphylla Compacta *Dwarf Kingsville Boxwood*

This Boxwood, offered for the first time, Spring 1940, is a new dwarf, very compact, and hardy Box, that is ideal for edging of rose and perennial gardens, edging walks, special gardens, such as **"Knott Gardens"**, figures, planting signs of the Zodiac, and a marvelous dwarf evergreen for the rockery.

This Boxwood has been tested at La Bar Rhododendron Nursery, Stroudsburg, Pa. in the Pocono Mts. where temperature, at times, registers as-low-as 20 degrees below zero, and has come through this low and freezing temprature, perfectly. (English Dwarf Box has most always suffered severely at this same point in Pa.). This is a real gem.

4 to 6 inches	$1.75	
6 to 8 inches	2.25	

Nidiformis *Nest-Shaped Dwarf Spruce*

This is of such extraordinary dense form and so closely branched that one wonders how the light ever gets to the lower branches. Branchlets in tight layers, the whole forming a dense, impenetrable head. It grows slowly, ¾ to 1¾ inches yearly. It is one of the true dwarf Evergreens. Its ultimate size is a matter dependant upon conditions.

4 to 6 inches	$1.25	$11.00

JAPANESE FLOWERING CHERRIES

We have for many years specialized in growing these Flowering Cherries.

Early in April, when the single varieties start to bloom and later when the double varieties flower, thousands of people journey to Washington, D. C., to admire the wonderful display of Cherry blossoms along the Potomac Basin, or to Riverside Drive, New York City.

This same colorful effect may be created with a few plants in your own garden. All Japanese Cherries are hardy and will grow well in almost any location, even in very shallow soils. They make splendid specimens for individua planting on the lawn, and the stronger-growing sorts are suitable for avenue trees.

Amanogawa. Semi-double. Fragrant pink flowers about May 10 to 15. Tree of characteristic Fastigiate habit up to 35 ft. high. An outstanding flowering tree.

Asagi (*Ukon*). Double, striking greenish yellow. Beautiful in late afternoon sunshine, especially when surrounded by evergreens.

2 to 3 feet	$2.50
3 to 4 feet	4.00

Botan-Zakura (*Peony Cherry*). Semi-double; pale pink flowers, on trees of rather small, flat, spreading crowns.

Fugenzo (*Kofugen*; *James H. Veitch*). Double; one of the very best. Vigorous grower. Deep pink blooms about May 10 to 15.

Gozanoma-Nioi (*Ozu-Mako*) (*Maybe Taki-Nioi*). Fragrant cascade, small tree, much branched, usually not more than 12 ft. high. Flowers single, pure white, up to 1¼ in. across. Very fragrant.

Hata-Zakura. Single white; rather fast grower, developing a sizable tree in short time.

Hi-Zakura. A beautiful deep pink, that blooms late. One of the finest.

James H. Veitch. See Fugenzo.

Kwanzan (*Also known as Kanzan, Sekizan, and Seki-Yama*). Tree upright-spreading, with a rounded crown, up to 20 ft. high. Rose red buds, flowers clear pink, fading but little. A splendid variety.

Meigetsu. Semi-double, blush to almost white.

Mikuruma - Gaishi (*The Royal Carriage Returns*). A small tree to 18 ft. high. Heavy bloomer. Blossoms are semi-double, fine pink.

Mount Fuji. See Shirotae.

Naden. See Takasgo.

Each Per 10

Ojochin (*Large Lantern*). Wide-spreading habit, up to 20 ft. Flower buds pink, opening faintly pinkish, semi-double.

Oshibayama. Single; blush pink to white. (8 to 10 ft. trees only.)

Sachalinensis-Sargenti. Single; pink flowers. Tree to 60 ft. Lovely avenue tree. A handsome tree, very hardy.

Senriko. Almost single; a beautiful pink flowering variety. Fine habit of growth, making up into an attractive medium sized tree.

Serrulata-Subhirtella. Grown from seeds. Various forms, such os, Upright forms and Weeping forms. These are pale pink flowers fading white. Flowers are in clusters of small blossoms.

LILAC-Species

This collection is rare and unusual. These are not generally found in our gardens, but should be because of their attractiveness. They extend the season of Lilac flowering to a longer time. The earliest variety coming into bloom about the last of April, and the last blooming variety comes into bloom about late June. Some grow into tree form, and others are dwarf bushy forms. A splendid addition to the garden.
